

Educational Campus Carlberggasse

Project Competition 2017

Recognition

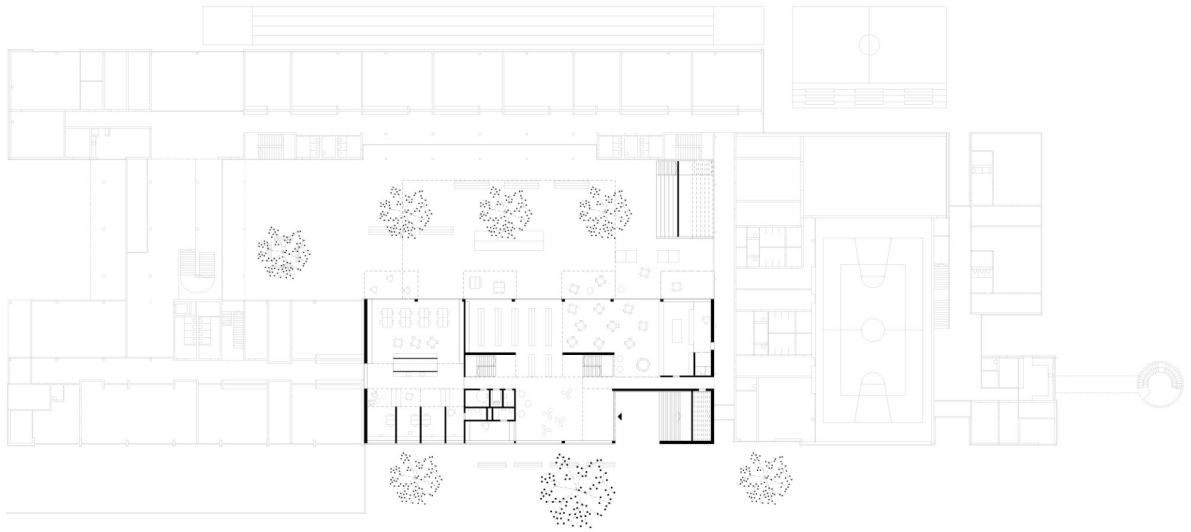

“Façade with depth”

Schenker

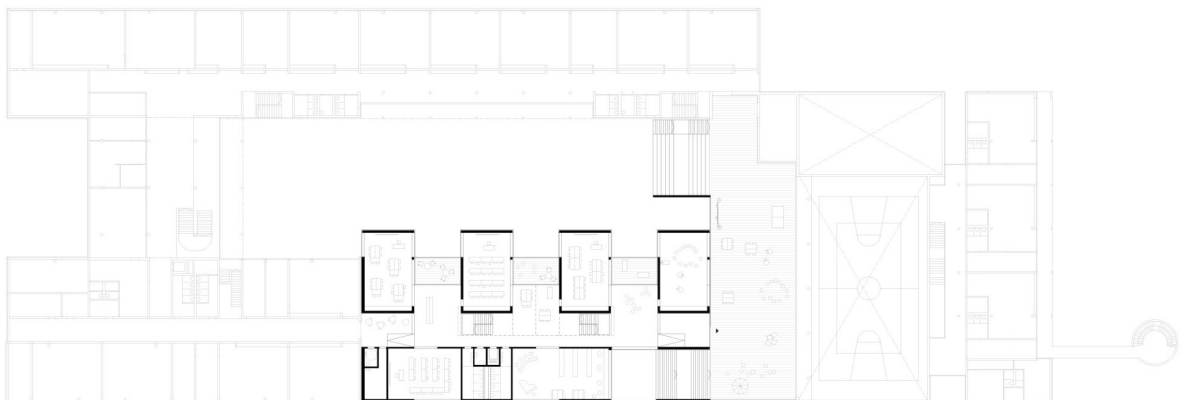

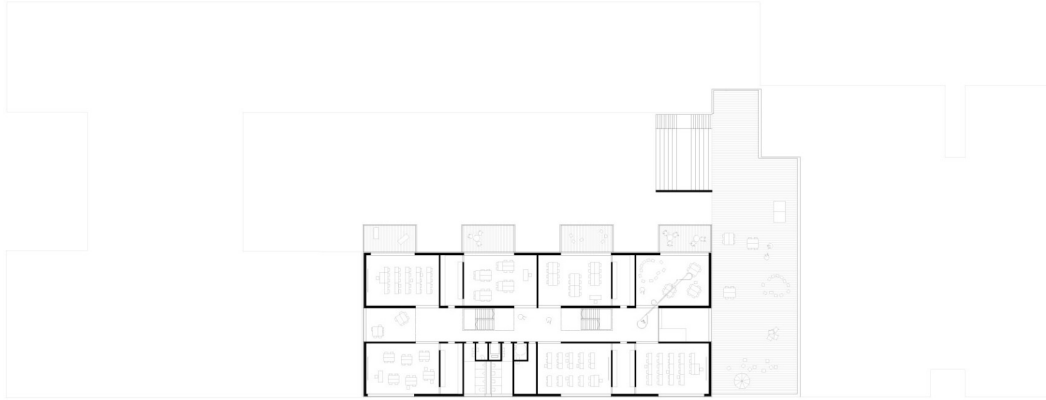

“Adding, instead of building anew: Transforming a 90ies hallway-school into a communicative campus, through concentrated, punctual interventions. The three-dimensional cubic façade is characteristic for the new school and offers terraces for various outside activities.”

Weber

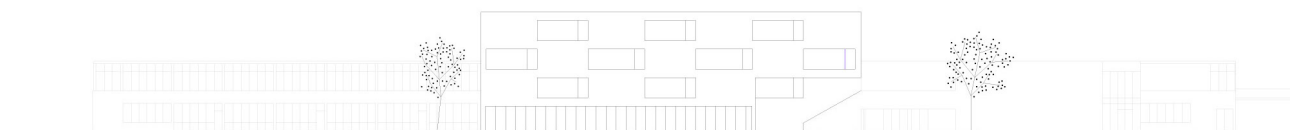

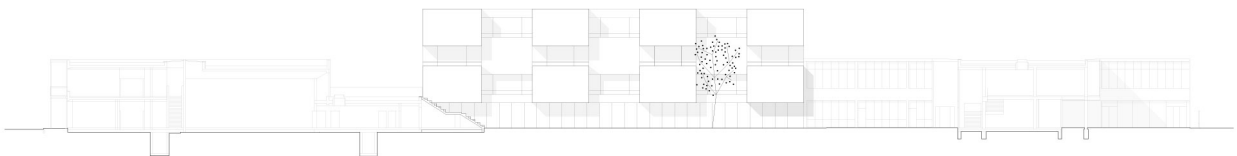

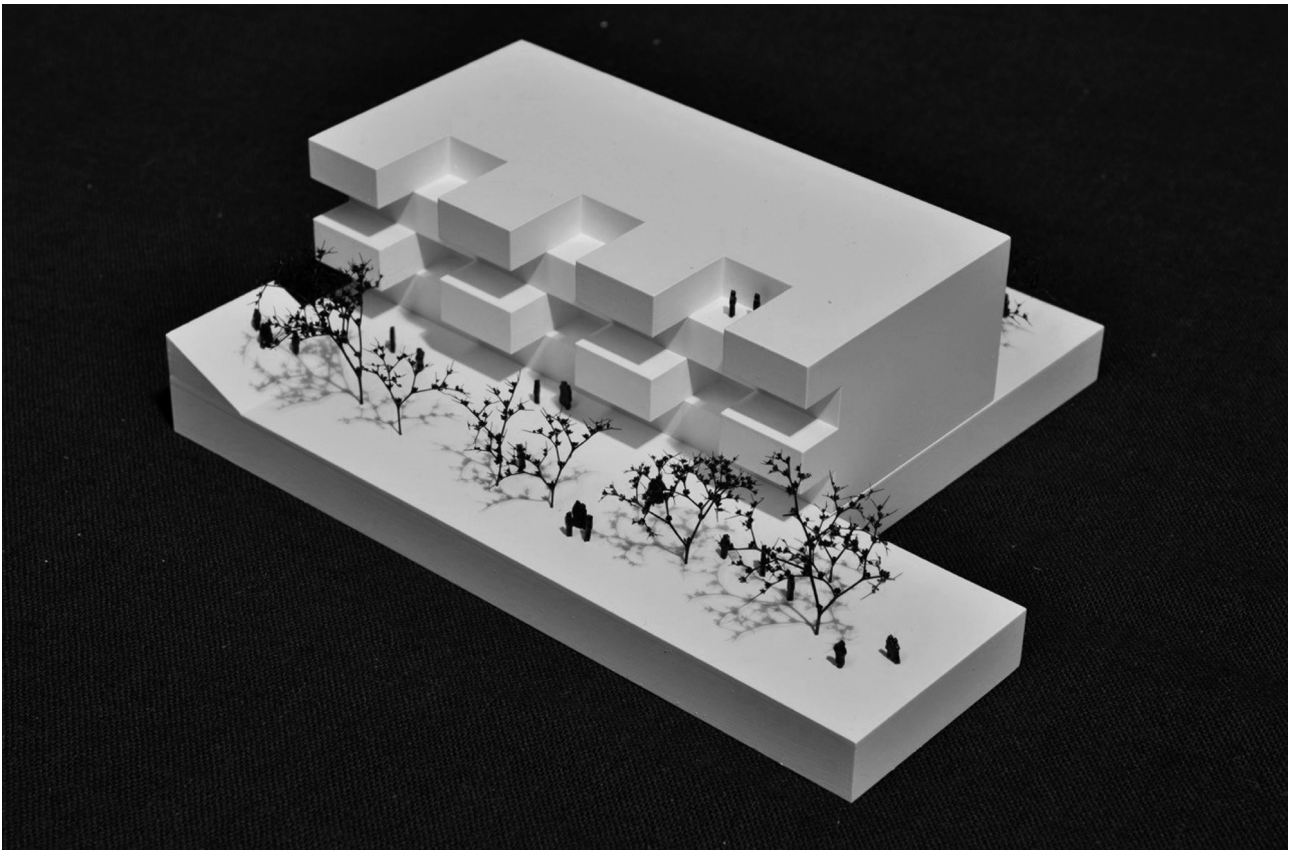

“The extension closes the gap and forms an intimate schoolyard for the whole school. The classes are rotated 90 degrees and pushed to the outside like drawers. Various exciting spaces and visual relations are generated.”

“Concentrated interventions organize the campus entirely new. The existing terrace above the gymnasium will be integrated into the new scheme through adding a wide tribune – only one of the small changes that make a big difference.”

PROJECT DETAILS

- Commission Type:
EU-wide, open, competition for realization
- Award:
Recognition
- Client:
City of Vienna MA56
- Location:
Vienna, AT
- Competition:
2017
- GFA:
4.519 m²
- Building Costs:
7,0 M EUR
- Energy Efficiency:
Passive House Standard
- Team:
Martin Maidl, Michael Salvi,
Andres Schenker, Veronika
Ševčíková, Rostislav Stoklásek,
Zsófia Varga, Thomas Weber

COOPERATION

- Fire Safety:
IMS Brandschutz
- Model Construction:
Modellbauwerkstatt Gerhard
Stocker
